

A METHOD, SYSTEM, AND STORAGE MEDIUM FOR PROVIDING  
COMPREHENSIVE ORIGINATOR IDENTIFICATION SERVICES

ABSTRACT

[0037] Embodiments relate to a method, system, and storage medium for transmitting enhanced originator information over a communications network. The method includes receiving information elements selected by an originator terminal from a database. The information elements retrieved are based upon a service plan and/or a terminal capability associated with a recipient terminal. The method also includes transmitting a communication including the information elements to the recipient terminal prior to establishing a communications session with the recipient terminal. The transmission is conducted over at least one of: an Internet Protocol network, a public switched telephone network, a wireless local area network, a wireless network, a cable network, a fiber optic network, a video network, and a satellite network.
